

## ON-DEMAND WEBINAR

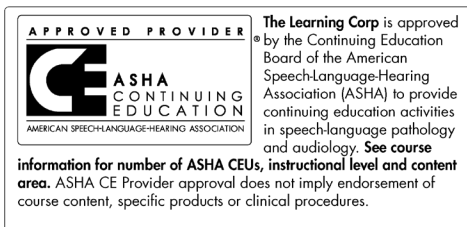

# A primer on Constant Therapy: Optimizing patients' recovery goals

Presented by:

**EMILY DUBAS**\_MS, CCC-SLP, The Learning Corp

### About this course:

More than 90 million Constant Therapy exercises have been completed by patients with cognitive, speech and language disorders. Through interactive demonstration, learn about the research outcomes from using the Constant Therapy program, and how this knowledge can help you incorporate its most effective features in your therapy sessions, and for homework.

This course is offered for **0.1 ASHA CEUs**  
(Introductory level, Professional area)

### In this webinar you'll learn how to:

- Describe findings identified using Constant Therapy with individuals with neurological disorders.
- Explain how to optimize and personalize your patients' Constant Therapy programs.
- Implement reporting features to support treatment decisions, documentation, and plan of care.

### Who should attend:

- Speech-language pathologists
- Occupational therapists
- Other disciplines such as physical therapists, social workers, and case managers

### Time-ordered agenda:

- 15 minutes: Review research and case studies using Constant Therapy
- 15 minutes: Explore how to customize Constant Therapy based on your patients' skills, goals, and ability levels
- 15 minutes: Interpret data and incorporate analytics into your electronic documentation
- 15 minutes: Question and answer

# Presenter bio

## **EMILY DUBAS\_MS, CCC-SLP, The Learning Corp**

Emily Dubas is the Clinical Services and Education Manager at The Learning Corp and a Speech-Language Pathologist at Spaulding Rehabilitation Hospital. Her experience is in working with individuals with neurological conditions in both inpatient and outpatient rehabilitation settings. Her clinical interests are in treating cognitive disorders in the areas of attention, memory, and executive functioning skills and incorporating technology into speech, language, and cognitive therapy.
